PROFESSIONAL PROFILE

I am an epidemiologist with a strong background in public health and medical statistics. I have a diverse range of skills, including conducting quantitative and qualitative research, data management and analysis, project implementation, and monitoring and evaluation (M&E). I am passionate about improving health and well-being by generating evidence that influences policies and strategies to prevent diseases, prolong life, and promote health. As an epidemiologist, I aim to use my analytical skills and expertise to guide evidence-based initiatives for maintaining a healthy society.

TECHNICAL SKILLS

- ✓ Data analysis using R
- ✓ Statistical analysis using R
- ✓ PowerBI
- ✓ Meta-analysis
- ✓ Time series and survival analysis
- ✓ Qualitative data analysis using NVivo

EDUCATION

Sept 2023 – Sept 2024 **Master of Public Health (Global Health), Grade - Distinction**

University of Nottingham, **United Kingdom.**

Sept 2017 – Dec 2021 **Bachelor of Science in Public Health, Grade - 2.1**

Jaramogi Oginga Odinga University of Science and Technology, **Kenya.**

EXPERIENCE

Academic Researcher

University of Nottingham, UK – (Dec 2023 – Sept 2024)

I worked on a health and well-being strategy and related policies analysis project. The project aimed to identify the stakeholders who have prioritised falls and would implement a Falls Management Exercise Programme (FAME) further. I analysed policies, strategies, and health and wellbeing reports across all local authorities in England to identify the stakeholders.

Responsibilities

- ✓ I conducted a content analysis of health and well-being strategies and related policies from the national to the Integrated Care System level.
- ✓ I was involved in a scoping review aiming to identify falls management interventions that can be used by people without clinical training. I screened publication titles, abstracts, and full-text screening, and extracted data from the included articles.
- ✓ Public Patient Involvement with service users on the development of a falls assessment checklist.

Research Assistant/Team Lead

African Population and Health Research Center (APHRC), Kenya – (May 2023 – Sept 2023)

I worked on a Kenya Abortion Study (KAS) research project with investigated abortion incidences, its methods and drivers, complications and post-abortion measures in the healthcare system.

Responsibilities

- ✓ Identified and recruited knowledgeable participants using a set of eligibility criteria across different counties in Kenya (Makueni, Embu, Tharaka Nithi).
- ✓ Supervised data collection among health providers across different counties (Embu, Tharaka Nithi and Marsabit counties)
- ✓ Coordinated communication between healthcare providers (data collectors) and the study team.
- ✓ Obtained and documented informed consent from the study participants before the interviews.
- ✓ Conducted interviews with all the recruited study participants and reviewed collected data to ensure all questions were completed before online submission.
- ✓ Performed other related duties as assigned by the Principal Investigator.

Research Assistant

Overseas Development Institute (ODI), Kenya (Jan – April 2023)

I worked on an ODI (Overseas Development Institute) consultancy project which investigated the successes and failures of resilience-building projects amongst indigenous peoples in Turkana. This project documented lessons learned after implementors exited and whether impacts were achieved.

Responsibilities

- ✓ Assisted in designing qualitative tools for interviews and focus group discussions.
- ✓ Organized fieldwork logistics and identified research sites.
- ✓ Reviewed selected project reports and conducted literature reviews.
- ✓ Conducted Key Informant Interviews, In-depth Interviews and Focus Group Discussions.

Project Manager

International Organization for Migration, Kenya (April -Dec 2022)

I managed a research consultancy project, "Migration, Environmental Degradation, Climate Change and Conflicts Nexus" commissioned by the International Organization for Migration (IOM). The project investigated how climate change leads to migration and conflicts in vulnerable communities.

Responsibilities

- ✓ Drafted the inception report considering key deliverables from the TOR.
- ✓ Designed research tools; interview guides and survey questions (used ODK).
- ✓ Conducted literature reviews using a literature review matrix.
- ✓ Organized fieldwork logistics and identified research sites.
- ✓ Assisted in recruiting and training research assistants.
- ✓ Collected qualitative data via focus group discussions and in-depth interviews including key informant interviews.
- ✓ Analyzed collected quantitative and qualitative data and
- ✓ Assisted in drafting and editing reports.

Research Assistant

WaterAid UK, Kenya (Feb – April 2022)

I worked on a WaterAid UK project titled "Gender, Climate Change and WASH Nexus" which investigated the linkage between gender, climate change and WASH (Water, Sanitation and Hygiene). The project explored measures taken by different WaterAid country offices in both the global south and north to implement gender-inclusive climate-resilient WASH facilities.

Responsibilities

- ✓ Assisted in designing research tools and collected qualitative data through interviews.
- ✓ Conducted a SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis on WASH policies.
- ✓ Managed the project data and information.
- ✓ Transcribed recorded audio into scripts using the Otter Application and thematically analysed the data using NVivo.
- ✓ Conducted case study analysis on Water, Sanitation and Hygiene projects and assisted in drafting final reports.

Health campaigner/Vaccinator

Ministry of Health, Kenya – 2021

This was a Vaccination Campaign against polio which reached out to 3.9 million children aged under five years.

Responsibilities

- ✓ I educated local communities through community-based talks in Embakasi East, Nairobi, Kenya on the adverse effects of Polio and Measles for children and the importance of vaccination.
- ✓ Ensured vaccines were stored at the right temperatures in the cooler boxes.
- ✓ I tracked daily vaccine usage and restocked from the Kenya Expanded Programme on Immunization (KEPI) storage.
- ✓ I administered Polio and Rubella Measles vaccine, inquired about Acute Flaccid Paralysis cases, and traced the cases.
- ✓ I ensured the safe and correct disposal of vaccine wastes
- ✓ I delivered daily updates on vaccination progress towards the target

Team Lead, Health Education

ChildFund International – 2020

The project aimed at improving adolescent girls' knowledge of drug abuse, menstrual hygiene, and Sexually Transmitted Diseases, and increasing their awareness of teenage pregnancies in Kibwezi, Makueni County, Kenya.

Responsibilities

- ✓ I conducted health education on adolescents on drug abuse, menstrual hygiene, STIs, and teenage pregnancies.
- ✓ I tracked daily attendance in the educational program.
- ✓ I distributed sanitary pads to adolescent girls and restocked daily.
